One supplement that can assist with every thing from immune function to wound healing to growth and development is Zinc. Present in every cell of the body, it is vital for our day to day lives. Vinco's **Zinc** comes in a liposomal form for better absorption and efficacy.†

Zinc (as zinc gluconate, citrate)

- An essential trace mineral found in plant and animal foods, as well as synthetically
- Necessary for, but not produced by the body
- Plays a crucial role in many biological processes†
- Acts as an antioxidant and has been shown to strengthen the immune system†
- Accelerates wound healing†
- Has the potential to reduce the risk of certain age-related diseases such as pneumonia†
- Not only has zinc deficiency been shown to induce depression-like and anxiety-like behaviors, supplementation has been used as a treatment for major depression.†
- Decreases oxidative stress and inflammation†

Liposomal Delivery

- Traditionally, orally administered vitamins and drugs have low bioavailability, meaning that the product loses potency while it is being metabolized, before it is absorbed by the cells in the body†
- Liposomal delivery has been shown to increase efficacy, bioavailability, absorption, and delivery
- It works to protect the nutrient against GI issues†
- Mimicks the structure of a cell membrane to specifically target the tissues it needs to without affecting other areas†
